Multi-stakeholder
platforms: Roundtable
Food Loss and Waste**

*Sharing experiences from the Dutch
multi-stakeholder platform working on
halving food loss and waste*

Dutch Ecosystem – Food Waste Free United

FOUNDING FATHERS

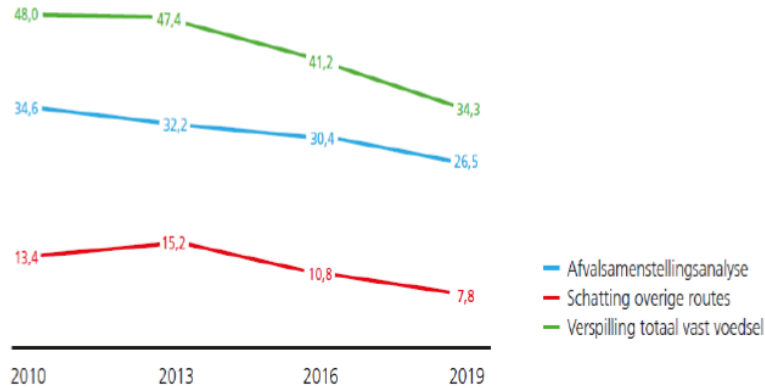

STAKEHOLDERS

Food waste at consumption stage

Dutch are on the front in the fight against food waste. In 2019 the rate of food waste per person was 34.4 kg, nearly 7 kg less than in 2016.

Target, Measure, Act

1. Monitoring progress and impact:

United Against Food Waste measures the effects of its individual and joint approach.

3. Joining forces to combat food waste by consumers:

United Against Food Waste aims to achieve sustainable changes in behaviour through campaigns, interventions and living labs.

2. Joining forces to combat food waste across the food supply chain:

Stakeholders and leaders combine their strengths, network and knowledge to develop innovative solutions.

4. Changing the rules:

United Against Food Waste promotes the legislation and instruments needed to create a circular economy.

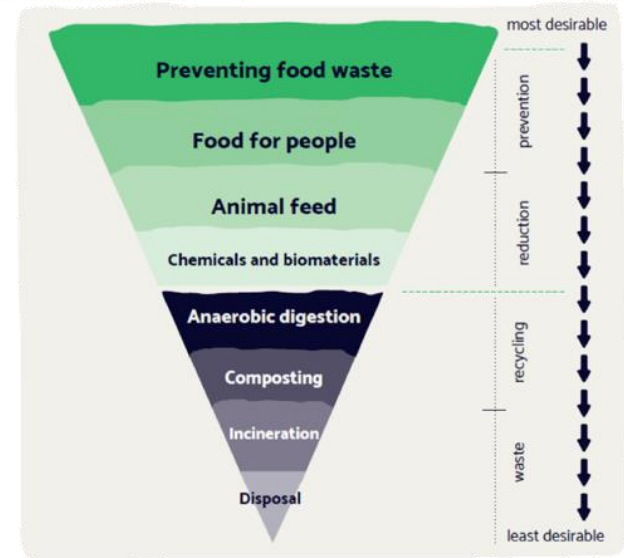

Dutch approach to delivering SDG 12.3

Dutch approach to MSP:

- Private sector, government, research, ngo's, consumer
- Build ecosystem & managing transition
- Name & fame – leading by example
- Field labs, living labs

Battle strategy

- Use the food loss and waste hierarchy
- Focus on optimum use of resources
- Full supply chain (from farm to fork)
- Prevention, reduction, valorisation

Key opportunity: sharing experiences

INTAFLOW - INdoDutch TAskforce against Food LOss and Waste Roundtable in October 2020, aimed at exploring the potential of establishing a National Task Force in India against Food Loss and Waste

Included the identification of potential first mover stakeholders, priority crops, focus area's/hotspots based on literature review and stakeholder consultation, resulting in roundtable (oct. 2020).

Main involvement of government and researchers, more priority needed from private sector and civil society.
